October 29th, 2009 Louisville KY GIE-EXPO

NoSpill LLC of Lenexa KS announces new DOT/UN approval for it's 5 Gallon portable fuel containers.

Company president Tom Cray states "On 10/27/09 our 5 gallon portable fuel container received DOT/UN certification from Container Technologies Laboratory Inc. The Department Of Transportation (DOT) certificate will be a bonus for our US customers and the United Nations (UN) certificate for customers worldwide. To our knowledge NoSpill is the only portable fuel container that is certified to DOT/UN standards as well as all previous safety and environmental certifications including CARB and EPA. Our design team developed an innovative cap which allowed us to pass the difficult drop testing of 4 ft at 0° F (-18C) directly onto the cap, and many other drop, pressure and vibration tests."

NoSpill became aware of the need for this certification from professional landscapers who have been fined up to \$2000 for transporting unapproved fuel containers, and from export customers who require UN certification. The 5 gallon size will be available 1st quarter 2010. NoSpills' 1¼ and 2½ gallon sizes may follow at a later date.

NoSpill fuel cans and accessories are available at quality lawn & garden equipment centers, Honda and Stihl dealers, as well as ACE, Do-it-Best and TrueValue hardware stores nationwide.
